

ABCs OF COMPOSTING AND YOU!

SUNDAY | MAY 25, 2014 | 12 - 3PM

BORDEAUX FARMER'S MARKET

*This event is **FREE** and open to the public*

Training provided by the Syracuse University Environmental Finance Center and Members of the Virgin Islands Recycling Partnership

It is estimated that between 60% - 65% of our waste stream is organic in nature and instead of adding this valuable product to our landfill, we could be creating rich organic compost to grow our food or use in other ways to benefit our community.

HANDS-ON TRAINING ON THE BASICS OF COMPOSTING:

- What is compostable?
- Why is it important?
- How to build your own compost bin
- Recycling tips for non-compostable materials
 - Aluminum, glass, paper, etc.
